

Trim Size with hem allowance. Nothing will print beyond this point.

Safe Guide. Keep important text and graphics inside this guide.

(Note: Elements you want to bleed should extend to the trim size edge. Anything you don't want turned to the back or stitched thru should remain inside the safe guide area.)

**CONVERT TYPE
to OUTLINES**

All type elements should be converted to outlines using the Create Outlines function in the type menu.

Photoshop/Photos

Should be at least 85 ppi (dpi) at the size they will appear when enlarged to final print size.
